1) The server sends its response

HTTP/1.1 200 OK

...<HTML>

2) The load balancer inserts a cookie and switches to the DATA phase

HTTP/1.1 200 OK

...Set-Cookie: SRV=1

<HTML>

3) The packet gets lost between the LB and the client!

4) After a delay, the server retransmits its response.

HTTP/1.1 200 OK

...<HTML>

5) The load balancer leaves the response intact, believing it is only DATA.

HTTP/1.1 200 OK

...<HTML>

6) The client receives a response without the cookie
